

## **Task for job: Full stack React & nodejs developer-Long term position**

- Write all code using TypeScript.
- Write a REST API sum using NodeJS that receives two number and returns the sum.
- Write a react app that shows:
  - Two textboxes, and a button.
  - When user inserts the numbers and clicks the button they will receive the sum from the server.
- Attached the design desired for mobile and desktop(css included):
